Game Hub

- **GitHub Repo:** https://github.com/nestorillo/Game-Hub-Nestor

- **Live Site:** https://game-hub-nestor.netlify.app

Reflection:

In this project, I built an e-commerce website for games. I am proud of the responsive design and user-friendly layout. However, if I had more time, I would work on improving accessibility and adding a better product filtering system.

Science Museum

- **GitHub Repo:** https://github.com/nestorillo/Science-Museum

- **Live Site:** https://science-museum-nestor.netlify.app

Reflection:

This project allowed me to improve my layout skills and understanding of Flexbox and Grid. I am happy with the interactive exhibits and design. For improvements, I would optimize image loading and enhance performance.

Chronicles of Maas

- **GitHub Repo:** https://github.com/nestorillo/chronicles-of-maas

- **Live Site:** https://chronicles-of-maas.netlify.app

Reflection:

For Chronicles of Maas, I focused on creating a blog with a consistent fantasy theme. I believe the overall design and styling match the content well. In the future, I would add search functionality and improve the mobile user experience.
